Our Scalers

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision knurling for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 18 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. of course, any manufacturer can make these claims, but we guarantee and certify ours.

- High-polish mirror finish tips.
- Manufactured within the guidelines of the FDA quality assurance system for good manufacturing practices.
- Highest grade German stainless steel, razor sharp, durable tips. Rockwell hardened to 60 RHc.
- 27 of the most popular designs from graceys to McCalls to columbias, and many european patterns.
- All instruments are guaranteed against defects in material and workmanship.
- All instruments bear the ce mark, emblematic of the european community's highest standards.
- Customer satisfaction guarantee, too!
- Less than 20 grams ... Lightweight for less hand fatigue.
- Manufactured to the most exacting standards so the 50th instrument you buy is exactly like your first.
- You decide ... Why pay more for the same high-quality instruments?

DIAGNOSTIC, PERIODONTIAL & RESTORATIVE INSTRUMENTS

VALUED BUYERS

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision knurling for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 20 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. of course, any manufacturer can make these claims, but we guarantee and certify ours. We regularly manufacturing below articles in showing handles & pattern A to L for better grip & perfection. We are also fully equipped & capable to develop these instruments as per your own specific requirements & demands in materials, sizes, shapes and patterns.

Wire Bending & Loop Forming Pliers

SV-2686
Adams, small wire bending and loop forming Pliers

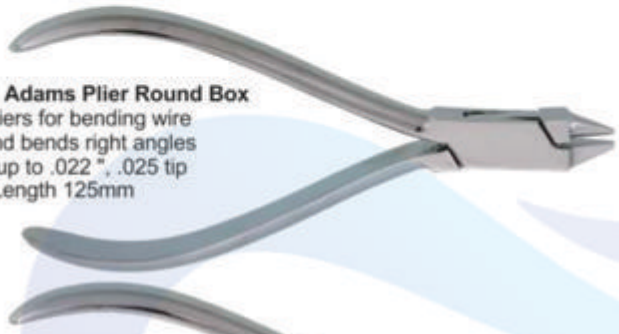

SV-2687
Bracket Removing Plier Round Box
Bracket removing plier for comfortable and quick removal of the brackets.
Length 135mm

SV-2688
Weingart Plier medium
Weingart plier that are ideal due to their curved tip for setting sheets and is capable of bending the ends.
Length 145mm

svdentix@gmail.com www.svdentix.com

BOX JOINT PLIERS

SV-2689 Adams Plier Round Box
Adams pliers for bending wire arches and bends right angles for wires up to .022 ", .025 tip to beak. Length 125mm

SV-2690
Falcon Beak
Contouring Pliers.

SV-2691
wires up to 0.020" / 0.7mm.

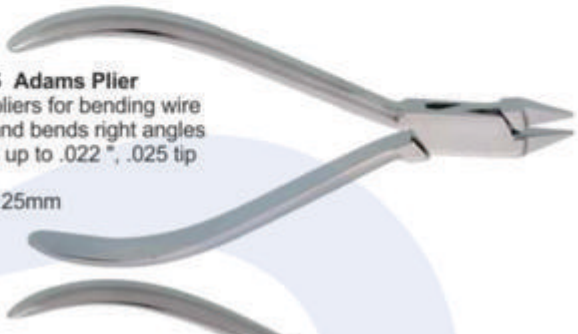

SV-2692
Johnson Contouring
Pliers

SV-2693 Aderer
Large wire bending
and loop forming pliers

SV-2694
Tweed / angle rectangular
arch forming & Torquing pliers

SV-2695 Adams Plier
Adams pliers for bending wire arches and bends right angles for wires up to .022 ", .025 tip to beak.
Length 125mm

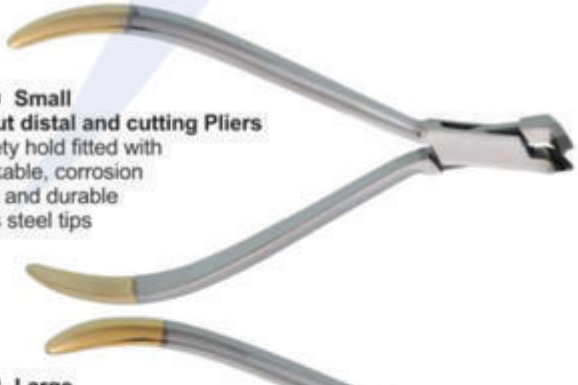

SV-2696
Tweed
Loop Formin Pliers

SV-2697 Bird Beak Plier Standard
Bird Beak Wire bending plier without notches, which is suitable as a universal utility tool.
Length 125mm

SV-2698
Mini Ligature cutters

SV-2699 Small
Fluch-cut distal and cutting Pliers
with safety hold fitted with un-breakable, corrosion resistant and durable stainless steel tips

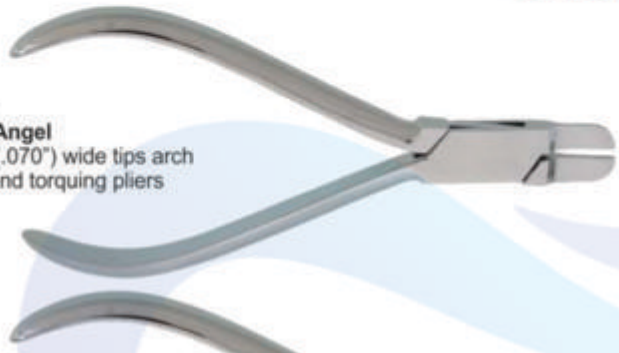

SV-2700 Large
Fluch-cut distal and cutting Pliers
with safety hold fitted with un-breakable, corrosion resistant and durable stainless steel tips

SV-2890

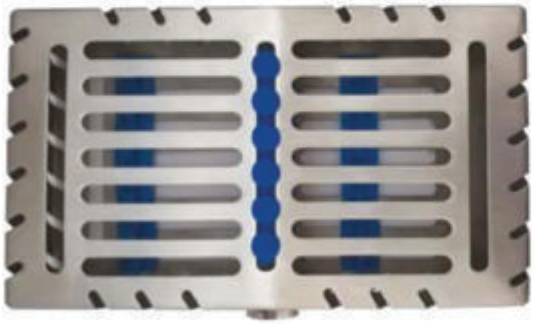

COMPOSITE INSTRUMENTS USE:

A composite (tooth colored) filling is used to repair a tooth that is affected by decay, cracks, fractures, etc. The decayed or affected portion of the tooth will be removed and then filled with a composite filling.

There are many types of filling materials available, each with their own advantages and disadvantages. You and your dentist can discuss the best options for restoring your teeth. Composite fillings, along with silver amalgam fillings, are the most widely used today. Because composite fillings are tooth colored, they can be closely matched to the color of existing teeth, and are more aesthetically suited for use in front teeth or the more visible areas of the teeth.

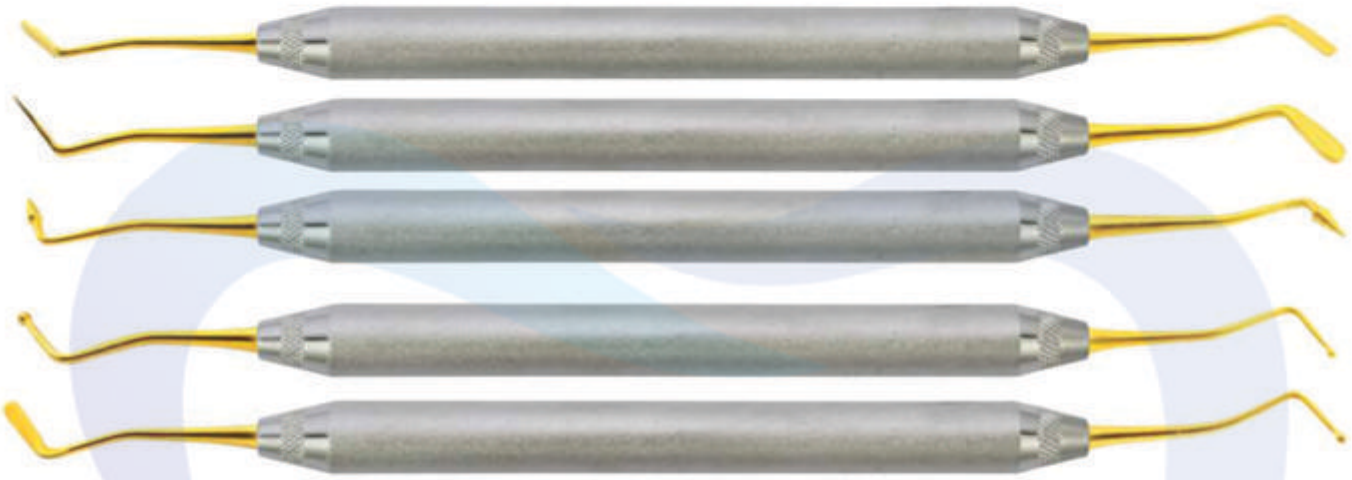

As with most dental restorations, composite fillings are not permanent and may someday have to be replaced. They are very durable, and will last many years, giving you a long lasting, beautiful smile.

Flexible Sinus-Lift Curettes – for an optimum sensitivity during the direct lift procedure
The perforation of the Schneiderian membrane is a complication that often occurs during a maxillary sinus floor augmentation procedure. The Sinus-Lift Instruments increase the sensitivity by blunt and flexible working tips with "Swing-Effect". Because of their special shapes and the characteristic of the stainless steel between the handle and the active part, light pressure is cushioned and gives the operator a direct and sensitive response. At the same time the risk to perforate the Schneiderian membrane is reduced to a minimum. Already at the development the focus was a practicable handling. Because of varying angulations and shapes of the active parts also in difficult areas they are easy to navigate also in difficult areas. The line of curettes consists of six different figures for every situation. They are complemented by spoon and condenser to place the bone graft.

The "Schneider's Membrane" of the sinus can be detached with curette by 1–2mm along the total cortical bone.

Curette is particularly useful in the lower part for detaching the membrane further. The same goes for the caudal area, especially when the membrane is 4–5 mm above the base of the maxillary sinus and the maxillary sinus is built up with granular material.

Curette makes it possible to lift the membrane further in mesial region. One working tip is especially designed for the right maxillary sinus and the other for the left maxillary sinus.

With curette the sinus membrane is further elevated in the upper and posterior part of the maxillary sinus wall.

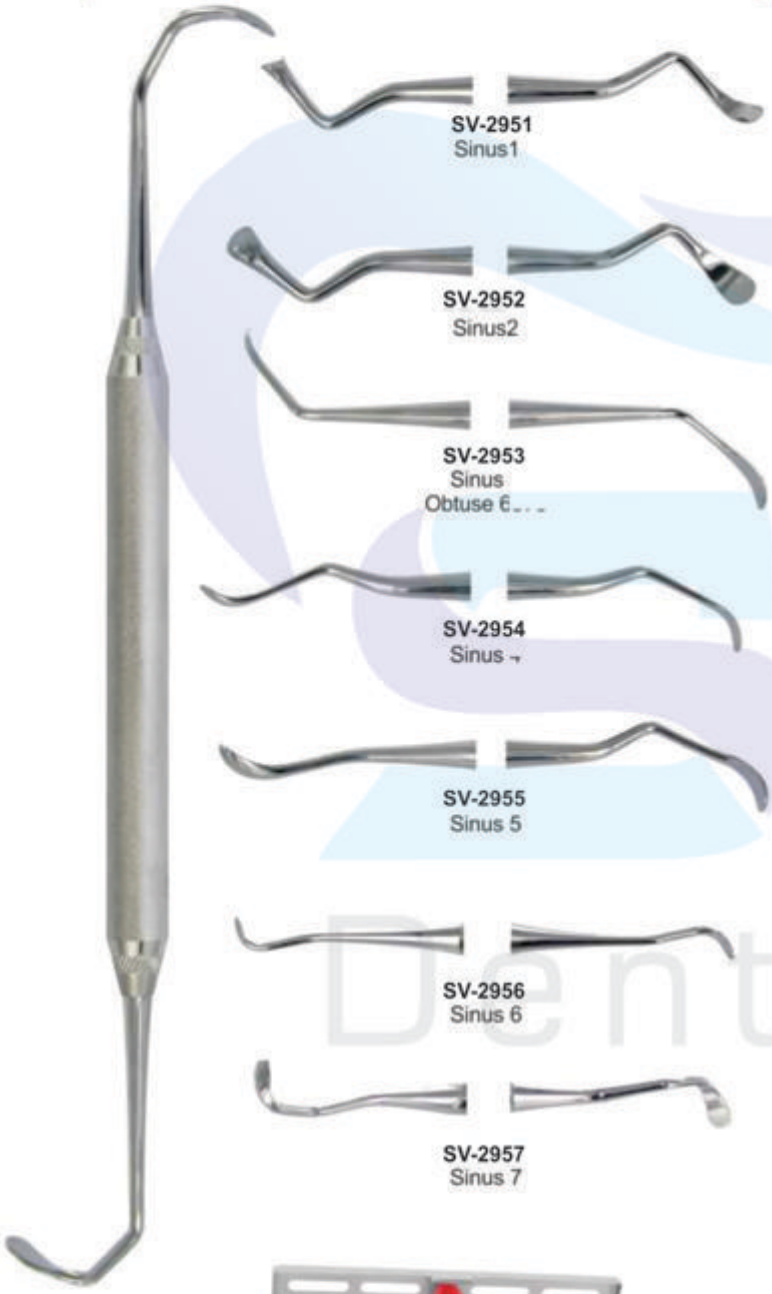

With curette the sinus membrane is further detached over a broad area in the inner region, especially along the roof of the palate.
